# Leandro Nascimento Camargo

## SOFTWARE ENGINEER

- + Software engineer based in Goiânia, Brazil.
- + Working professionally since 2004.
- + Around 10 years of remote work experience.
- + Expertises: full stack web development, product management, project management, UX, etc.
- + Over 10 years of experience with Ruby/Rails.

Fond of simple and yet elegant solutions. Keen eye on design and usability. Concerned about welfare in work environment, good quality code and good communication with peers and clients. Very open and interested to learn new technologies, like Go, Node.js, Elixir, Rust, Flutter, React Native, etc.

## Experience

### Senior Software Engineer @ Voz Digital Soluções Inteligentes

OCT 2018 - JUL 2019

I developed a web platform that aims to help public service agents to control and combat mosquitos that spread diseases (mainly Dengue fever) across the country. It involves many sorts of geographical/maps manipulation (using leaflet.js + mapbox + postgresql + postgis). The back-end is built on top of Rails 5. The front-end uses both jQuery and Vue.js/Vuex.

ruby 2.x rails 5 postgresql postgis leaflet.js vue vuex jquery design  
ux bootstrap css

### CTO & Co-founder @ Yepness

FEB 2018 - JUN 2019

Yepness is an Airbnb-ish solution to provide great, exclusive, cool and exquisite places for corporative events, generally small/mid-sized, delivering a smooth experience in a simple and easy way to both parties (hosts and event organizers). My mission in there was to develop and deliver good quality service to the company clients, using Ruby on Rails.

ruby 2.x rails 5 postgresql jquery product management devops ux  
css

## Software Engineer @ HE:labs / Impulso

MAR 2017 - APR 2018

I worked as a full stack web developer using Ruby on Rails to build a variety of internet based solutions for all sorts of clients: startup MVPs, big consolidated companies needing a spin-off or consolidated solutions needing new features and improvements (legacy projects).

ruby/rails postgresql jquery product management project management  
ux react css responsive

## Senior Software Engineer @ Assembla

AUG 2011 - JUN 2016

I worked with a wide stack in there, including Rails 3 and 4, Javascript, jQuery, React.js, Google BigQuery, MySQL, Redis, RabbitMQ, Git and SVN bindings, Elasticsearch and etc, always focusing on performance and usability.

Beyond the technical aspect, I got involved a lot with the business side of SaaS aspects. I made product management, design and project management decisions, given I acted as Product Manager for some time and as Technical Team leader on the Tickets team (the most used product by our clients).
